

inoxveneta

Passion For Efficiency

MANAGING INDUSTRY 4.0 AND CARRYING OVER **40 YEARS EXPERIENCE IN THE BUSINESS.**

INOXVENETA serves those businesses that demand **strict tollerances and very high finishing** for stainless steel components.

Particularly:

- Food and Beverage Processing & Packaging
- Food Equipments
- Automotive
- Medical
- OIL & GAS
- Design for Home & Office Furniture

A SOUND REPUTATION IN STAINLESS STEEL PROCESSING.

Sat up in 1972 in the heart of Veneto, for more than 40 years Inoxveneta has been operating with proficiency in the stainless steel industry.
Three plants, two in Vittorio Veneto (ITALY) and one in Strzelin (POLAND).

INOXVENETA operates with a **lean organization** to manage innovation, machineries and technology at the highest levels toward the efficient engineering of customized components.

INNOVATION **AS THE MAIN DRIVER**

With a **highly specialized know-how** and **four big presses for hydroforming** we are one of the very few centers in Europe that works in this particular field of technology.

ADDING VALUE TO THE TECHNICAL PERFORMANCE OF PRODUCTS.

Hydroforming

and elastoforming, joined with conventional technologies (like laser cutting and bending), are usable in a large variety of cases, **adding efficiency** to our productive process and **expanding our Clients' horizons towards new technical solutions.**

Hydroforming leads the way to completely new possibilities in metal sheet and tube processing, especially when complex shapes are needed, also in small batches.

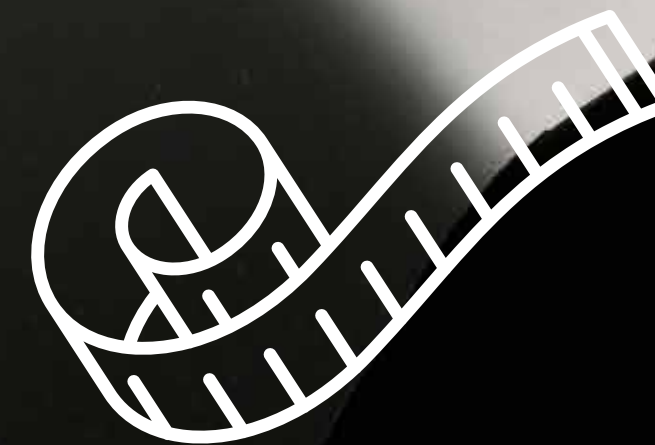

KEY FACTORS BENEFITING **OUR CUSTOMERS' PERFORMANCE:**

- Joint engineering of product and process
- Co-design
- Engineering team with long experience and sound competence
- Prototyping
- In-house tool engineering and tool construction department

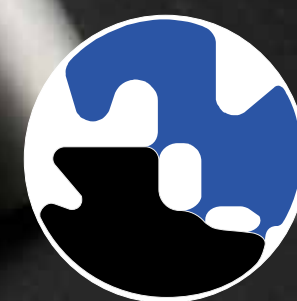

**Everything
under the same
roof.**

TAYLOR MADE

Supplying a **taylor made service** for each
Customer.

**Joining experience, reliability and
flessibility** for ever more performing results.

inoxveneta
Passion For Efficiency

R&D ALLIANCE

Monitoring metal sheets and tubes technological evolution worldwide, **with the aim to be always able to offer the highest competitiveness to our Customers.**

inoxveneta
Passion For Efficiency

TECHNOLOGY SCOUTING

Always searching for new technologies and world-class manufacturing solutions for metal sheets and tubes making.

inoxveneta
Passion For Efficiency

COLLABORATIVE INNOVATION

To stay interconnected with Customers and their Teams, **collaborating with their R&D for new products development.**

inoxveneta
Passion For Efficiency

COMPETENCIES & **SKILLS**

STAINLESS STEEL on demand

- Leveling and cut-to-length of coils
- 2D laser cutting and CNC punching
- 3D laser cutting
- CNC bending
- Robot welding
- TIG, MIG, plasma, electric spot welding
- Tube bending
- Hydroforming and elastoforming

HYDROFORMING

- Sheets
- Tubes

inoxveneta
Passion For Efficiency

ASEPTIC PRESSURE VESSELS

- Food, dairy, chemical and pharmaceutical equipments applications
- Customization for dimensions, diameters, accessories

DRAWER SLIDES AND COMPONENTS

for catering equipments

- Single and telescopic drawer slides
- Side panels and bottoms for refrigerating cabinets
- Foamed doors for refrigerating tables
- Set of drawers for refrigerating tables
- Cook tops

AUTOMOTIVE

- DeNOX systems with SCR technology
- Exhaust gas pipes
- Exhaust mufflers and tips
- Suction pipes

STAINLESS STEEL ELECTRICAL ENCLOSURES

- Enclosures
- Junction boxes
- Modular free-standing enclosures
- Compact free- standing enclosures
- Customized products

“ **FOR US STAINLESS STEEL IS BEAUTY,** FOR EVER
RECYCLABLE, WE COLLABORATE WITH OUR
CUSTOMERS IN ORDER TO GET THE MOST FROM IT.

”

With our level of expertise in stainless steel processing, we are proud to offer to our Clients the support they need to **make their products something competitive and fruitful even in the long run.**

**COLLABORATION IS IN OUR COMPANY DNA
SINCE FOREVER!**

Let's meet online.
